

Vision

We will provide all children with challenging and exciting 'hand-on' opportunities to question and investigate the wonders of the world around us. We will support you to become confident, passionate

You ask
'How?' and
'Why?'.

You ask
questions
about
science in
your
everyday life.

You can plan
your own
investigation
s and
challenge
your own
understandin
g.

You can
learn from
science
sessions
across the
whole
school.

You can use
your learning
to support
your
understandin
g of science
as your get
older.

Teachers will share their good ideas with each other so that you can benefit from good teaching in your lessons.

Science teaching and learning is good when:

- you can talk to teachers about your science lessons;
- you have exciting and engaging topics;
- you open-ended, hands on, real world investigations;
- staff are confident in their subject knowledge through CDP;
- children take ownership of their investigations;
- we use different areas of our school to learn;
